Re: Ms Mariska Mooijekind and Organise This

I am a Professor at the University of Cambridge who participated for many years in the yearly event organised by IPFA (International Plasma Fractionator Association) where I met Mariska and was able to appreciate her competence and her pleasant and efficient way of running international conferences.

This is why I hired her competitively to help me organise a conference in Cambridge called: VIth Symposium on Advances in Transfusion Safety held 6th and 7th July 2009. This conference assembled 120 experts from developed and developing countries to discuss blood safety issues. Having to deal with developing countries made it particularly challenging in dealing with transport, visas, exchange etc. On all accounts Ms Mooijekind prove to be as efficient and pleasant in corresponding with speakers, chairpersons, sponsors and participants before, during and after the conference. I received only praise from all participants of her ability, good manners and efficiency. In some delicate situations she always worked out solutions with tact and a smile. Should I need help to organise another such conference, I will certainly call on Mariska.

Yours sincerely

Jean-Pierre Allain
Professor of Transfusion Medicine
